

Freedom Hospice Your Personal In-Home Care Team.

Our care teams have a singular focus on helping patients and their families through a vulnerable time with comfort and dignity. It's about skill, experience, collaboration, communication and compassionate care. And it's all centered on the patient and their family.

Freedom Hospice services are built on a holistic care model. Guided by a physician, our team of professionals creates a caring atmosphere that helps people make the most of each day – it's all inter-related, so Freedom Hospice services are a coordinated, specialized set of care activities.

Holistic care for patient and family

Why Freedom

Freedom Hospice provides specialized care to help patients make the most of each day. Through sensitive, holistic care of the patient and family, Freedom Hospice affirms life during a vulnerable time. Our inter-disciplinary team of professionals creates a caring atmosphere which includes the patient, the family, and the patient's physician.

Our Team

Team members at Freedom Hospice possess both the external measures of competence—degrees, certifications, and experience—and the personal qualities that will provide comprehensive end of life care... qualities like compassion, emotional and spiritual support for the patient in accordance with their own priorities.
